

Home energy upgrades
just got a whole lot easier.

Brought to you by:

So, you're considering a home energy upgrade:

Congratulations! You're one step closer to year-round comfort, energy bill savings and a greener home.

You may qualify for thousands of dollars in government and utility rebates. But the process can be complicated and overwhelming. The **Home Energy Navigator** has got you covered. We are a free program created by local government in the capital region to help homeowners throughout their retrofit journey.

Sign up only takes 5-10 minutes.

Once you're reconnected with an Energy Concierge, we'll help you map out your home energy project and provide free expert support so you have reassurance that you're on the right track.

Home Energy Navigator gives you access to:

A virtual home energy consultation.

Rebate application support and quote comparisons.

Home upgrade project mapping and advice on approaching and communicating with contractors.

Retrofit resources, webinars, workshops and more!

We'll help you find the most energy-efficient technology to fit your needs.

An energy-upgraded home is a resilient, climate friendly home that helps you save money and enjoy comfort year-round. It's an investment that benefits your family now, and in the future.

Participate in this **free** program by filling out a registration form online at:

homeenergynav.ca or
call 1.866.381.9995

Our energy experts are here to help as much (or as little) as you need.
